Using tagged blocks

The following Mathematica code block contains a matched `mmaBeg/mmaEnd` pair, with the tag name `info`, to capture the output from the formatted Mathematica `Print` statements.

```
(* mmaBeg(info) *)
Print[OutputForm["Date : &"    <> ToString[DateString[]]<>"\\\\"]]
Print[OutputForm["System : &"  <> ToString[$System]<>"\\\\"]]
Print[OutputForm["Version : &" <> ToString[$Version]]]
(* mmaEnd(info) *)
```

```
\bgroup\tt
\begin{tabular}{rl}
    \mma{info}
\end{tabular}
\egroup
```

Here is the output caught from the above block.

```
   Date :  Mon 27 Aug 2018 10:16:28
 System :  Mac OS X x86 (64-bit)
Version :  11.3.0 for Mac OS X x86 (64-bit) (March 7, 2018)
```
